

Jayline

The trusted name in home heating since 1975. Jayline has an extensive range of models, both radiant and convection, suitable for any home requirement. All Jayline's are NZ made, this means that when buying a Jayline fire you can enjoy the piece of mind that comes from owning a superior product as well as enjoying the many benefits that come from a product supported by a national organisation. When you buy a Jayline, you're getting a quality appliance that's designed to give many years of reliable service.

The Signature Series: Jayline's industry standard range that delivers value for money without sacrificing heat output or product design. Jayline in conjunction with 4 Seasons Home & Leisure has developed this range that when installed using Easy Heat™ (industry best practices and accredited installers) you are getting the solution you are looking for. After all the fire is only half way to a warm home!

The Cast Series: Jayline has reintroduced the trusted and age old established qualities that cast iron brings to the firebox - 'cast to last' is not to be ignored when it comes to choosing the right heating solution.

The Convection Maximiser Series: Jayline has for many years used this technology to enhance the air flow and heat transfer from the fire to the wider home area. This design feature ensures you have a warm house not just a warm fire. The Convection Maximiser Technology allows a smaller unit to distribute the heat more effectively and use less wood. At the same time this range has a wider warranty given the cooler fire box temperatures.

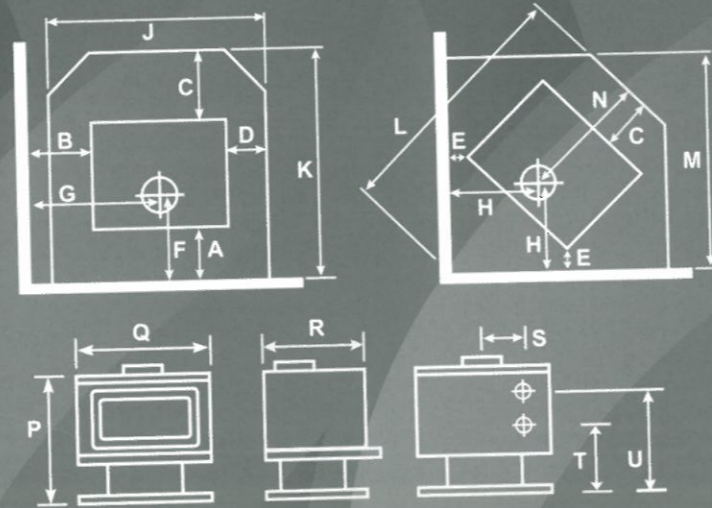

Ask your home heating consultant about these and many more benefits that come from owning a Jayline heating solution.

The Jayline Wood Fire Warranty

When you buy a Jayline Wood Fire, you're getting a quality appliance that's designed to give many years of reliable service. Rigorous testing is performed on all Jayline's in independent laboratories and domestic situations. Full compliance with safety, performance and emission regulations is of paramount importance. For this reason you are offered a comprehensive Firebox Warranty on all Jayline products.

CS400

This is the first in the series of Jayline cast iron fireboxes. The CS400 has a contemporary design that will fit any home décor. It's sloping door and cast iron construction ensure maximum heat output.
