## THE SAFFIRE

Creations of comfort easily warm to this attractive addition to the Jayline collection. The Saffire II is the culmination of 20 years of design excellence. The exclusive Convection Thrusters™ found on all Jayline's give unprecedented air flow and heating power, while the Fire Guard™ construction guarantees a longer lasting home heating system. The Saffire II can turn any small to medium sized home into a den of bliss, no matter what the season outside.

\$

## THE CLASSIC

The classic good looks are heart warming, while the classic performance takes care of the body. The Classic is the all time, timeless, ultimate comfort machine for all medium sized homes. With Jayline's advanced heating technology, the Classic boasts all our exclusive and proven features, it also includes a sturdy steel firebox with ceramic lining. Bask in the glorious warmth of the Classic and you will know what it is to be a true creature of comfort.

\$

## THE SPITFIRE

In days gone by, large rooms and homes were usually cold rooms and homes. That was before the Spitfire blended style and performance to transform larger spaces into luxurious spaces. Armed with the full compliment of our advanced heating innovations and features, clean lines and such superior design features as Surround Vision Glass, the Spitfire brings the warmth of sunshine to the largest space.

\$

## THE STARFIRE

As the name suggests, this is the star of the Jayline woodstove range. It's big and it's beautiful, this heating beast is perfect for larger spaces and more extreme winter chills. Thanks to our innovative features, the Starfire has a huge output that ensures warmth in homes in excess of 200 m<sup>2</sup> (2000+ sq feet). The Starfire's large ceramic lined firebox will deal with logs up to 450mm long and with Econo Burn Technology TM, you know it's working efficiently. Jayline woodstoves are built for creatures of comfort and the Starfire is the king of that domain.

## TESTED ON ANIMALS

Designed for Creatures of Comfort

At Jayline, we care about where we live. Our philosophy is that if it's good for the environment, it's good for us. Every Jayline built is proof of our commitment - exclusively designed by engineers who understand the situation and have years of experience in clean burning technology. Be green, burn clean, CleanAir.

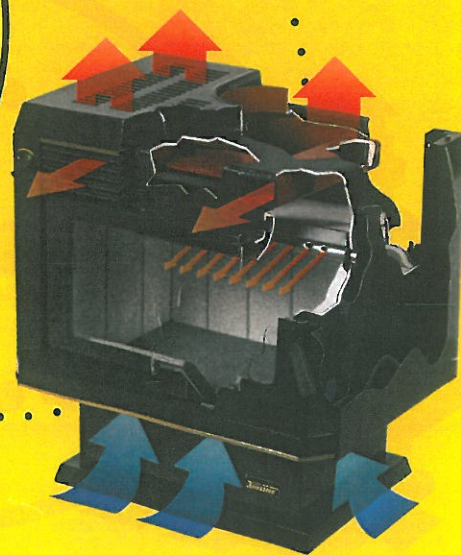

What's the point of being warm if the heating bill leaves you cold? At Jayline we believe that just because the heat goes up, the cost doesn't have to. Jayline wood fires develop and incorporate the latest in high efficiency combustion design. High heat, low cost, Econoburn.

Jayline wood fires feature the best warranty in the business. The Fireguard fire box of every Jayline is the toughest beast available and it's guaranteed for 10 years from the day you buy it, at no extra charge. This is a full firebox replacement warranty and covers parts and labour. King of the beasts,

It's survival of the fastest in the heating kingdom. Thanks to Jayline's unique convection thruster system you'll warm up quicker than ever. Air is super heated in tubes that run through the middle of the fire box and put directly to use. Traditional wood fires are slower because they rely on heating the air outside the fire box. Quick Fire, Convection Thrusters.

\$

## THE CLASSIC INSERT

The Classic Insert delivers the same superior performance in a sleek, attractive model. The Classic Insert installs easily into existing fireplaces or, with the Jayline Heatcell, fits directly into any wall space without the need for added insulation. Jayline's innovative technology, proven construction and leading design add up to make the Classic Insert the ultimate in high performance heating that keeps living space alive for you.

## THE SPITFIRE INSERT

The quest for the perfect and latest in high performance, high economy, insert woodstoves, ends at the Jayline Spitfire Insert. Boasting the same outstanding internal features as the freestanding Spitfire, it really adds a new dimension to 'creature comfort'. If you have a large space that needs warming, without much room for the woodstove, the Spitfire Insert can also be installed with the Jayline Heatcell for the ultimate in space saving efficiency.
