 The trusted name in home heating

## The Jayline Story

When you buy a Jayline fire you can enjoy the peace of mind that comes from owning a superior product. Our dedicated research, development and technical team has a steadfast commitment to producing superior fires that are both efficient and affordable for New Zealanders today.

Jayline's exclusive Convection Maximiser Technology provides superior heat through enhancing the air flow and heat transfer from the fire to the wider home. Air is super heated in tubes that run through the top of the firebox and is then put directly to use. This design feature ensures you have a warm house not just a warm fire. The Convection Maximiser Technology enables a smaller unit to distribute the heat more effectively and efficiently.

### The Jayline Wood Fire Warranty

When you buy a Jayline Wood Fire, you're getting a quality appliance that's designed to give many years of reliable service. Full compliance with safety, performance and emission regulations is of paramount importance. Rigorous testing is performed on all Jayline's in independent laboratories and domestic situations. For this reason you are offered a comprehensive Firebox Warranty on all Jayline products.

Ask your local home heating expert about these and many more benefits that come from owning a Jayline heating solution.

Convection Maximiser Series

## SS400

The SS400, like the smaller SS200, combines modern clean lines with a large glass front. This SS400 firebox includes Jayline's exclusive Convection Maximiser Technology with the added bonus of a radiant cooktop.

Radiant & Convection Heating:	Yes
Recommended Heating Area:	130-180m <sup>2</sup>
Emissions:	1.37g/kg
Efficiency:	66.4%
Cooktop:	Yes
Floor Protector Required:	Non Insulated
Clean Air Authorisation Number:	N0025

Convection Maximiser Series

## Spitfire

The Spitfire blends style and performance to transform larger spaces into luxurious spaces. This fire has the full complement of our Convection Maximiser Technology, clean lines and superior design.

Convection Heating:	Yes
Recommended Heating Area:	130-180m <sup>2</sup>
Emissions:	1.34g/kg
Efficiency:	69.6%
Cooktop:	Yes
Floor Protector Required:	Non Insulated
Clean Air Authorisation Number:	N0024

Signature Series

## IS500

The quest for the perfect and latest in high performance, high economy, clean air wood inserts ends with the Jayline IS500. The clean contemporary lines, large viewing glass and metallic black matt finish of the IS500 enable it to fit any home décor.

Convection Heating:	Yes
Recommended Heating Area:	130m <sup>2</sup> -170m <sup>2</sup>
Emissions:	.9g/kg
Efficiency:	67%
Floor Protector Required:	Insulated
Clean Air & ECan Authorisation No:	111085

Signature Series

## DM500

The DM500 is a modern styled fire that uses diesel as fuel. It is cost effective to run and produces a constant heat output.

Convection Heating:	Yes
Recommended Heating Area:	100-120m <sup>2</sup>
Emissions:	N/A
Efficiency:	N/A
Cooktop:	Yes
Floor Protector Required:	N/A
Wetback Available:	Yes

Signature Series

## SS200

The SS200, like the SS400, has a modern sleek outer wrap design that will enhance any room. This fire uses radiant heat transfer to warm smaller open areas.

Radiant Heating:	Yes
Recommended Heating Area:	120-160m <sup>2</sup>
Emissions:	.95g/kg
Efficiency:	65.8%
Cooktop:	Yes
Floor Protector Required:	Non Insulated
Clean Air Authorisation Number:	N0023

Signature Series

## SS300

The contemporary design of the SS300 enables the fire to blend with any décor. This fire provides maximum convection air flow and is ideal for heating smaller areas.

Convection Heating:	Yes
Recommended Heating Area:	120-160m <sup>2</sup>
Emissions:	1.03g/kg
Efficiency:	70.8%
Cooktop:	Yes
Floor Protector Required:	Non Insulated
Clean Air Authorisation Number:	N0016
